**UNIVERSITY
OF THE YEAR
FOR STUDENT
EXPERIENCE**

S1 & S2

It's a good idea to choose a broad range of subjects for N4 and N5 to help keep your options open

Extracurricular activities are a great way of strengthening your application.

Choose subjects you enjoy, this can help you decide what you'd like to do after school.

S3 & S4

While choosing your N5 and Highers, start to think about what courses interest you and whether they require any essential subjects. This also applies to apprenticeships and college courses

Work experience can help you to find out more about specific careers.

S5 & S6

Most universities will let you order a prospectus or download one online.

- Start researching universities and whether they have the courses you're interested in
- This is a great time to attend open days and get a feel for university life
- You'll now be ready to apply to your chosen universities through UCAS
