Website accessibility

Accessibility and usability have been key elements in the formation of the Technology One Ci Anywhere 2020B platform. As such, Technology One strives to achieve a web accessibility compliance level of [Web Content Accessibility Guidelines (WCAG 2.1)](#) [external site] Level AA in accordance with the [recommendations of the Australian Human Rights Commission](#) [external site]. We are committed to providing a platform and online information that are accessible to the widest possible audience, regardless of location, technology or ability.

To demonstrate our commitment, we sought expert, independent accessibility testing by the [Centre for Inclusive Design](#) [external site] (CfID), who have assessed the platform against WCAG 2.1 Level AA, an international benchmark developed by the World Wide Web Consortium (W3C) of which CfID is a member.

Rigorous compliance testing was conducted in a single round and in accordance with the [Web Content Accessibility Guidelines Evaluation Methodology (WCAG-EM)](#) [external site].

Based on the review for compliance with WCAG 2.1 Level AA, Technology One Ci Anywhere 2020B has scored an accessibility percentage across the sample selection of **90 per cent**, indicating that the platform has met or close to meeting WCAG 2.1 Level AA. The platform contains only a few accessibility issues.

Contact us regarding an accessibility issue

The Technology One Ci Anywhere 2020B platform has been optimised to be as inclusive as possible and achieve high accessibility standards. The platform and its content are constantly evolving, and efforts have been made to ensure usability across all aspects. If you experience accessibility issues, please contact Technology One Support.

Known limitations

When the assessment was completed in *November 2020* on the Technology One Ci Anywhere 2020B platform, there was a minor spelling issue due to the platform limitation. In addition, some labels are not announced on Chrome with JAWS and NVDA and forms have some colour contrast issues. The Technology One is a dynamic platform that is regularly updated, and it is possible that additional issues maybe introduced after *November 2020*. Please let us know if you encounter any issues.
